

Number triangles

Naturally and integrally

Triangles? Rectangles!

1 Problem – Number triangle, addition, 1–10

Piotr Nieżurawski, update: 2017-07-28, id: en-numbers-0000200, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the sum of the numbers from the two nearest rectangles from the lower row. Enter the appropriate numbers in the empty rectangles.

Answer:

2 Problem – Number triangle, subtraction, 1–10

Piotr Nieżurawski, update: 2017-08-01, id: en-numbers-0000201, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the difference of the numbers from the two nearest rectangles from the lower row: from the number in the left rectangle the number in the right rectangle is subtracted. Enter the appropriate numbers in the empty rectangles.

Answer:

3 Problem – Number triangle, addition, 0–10

Piotr Nieżurawski, update: 2017-07-28, id: en-numbers-0000205, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the sum of the numbers from the two nearest rectangles from the lower row. Enter the appropriate numbers in the empty rectangles.

Answer:

4 Problem – Number triangle, subtraction, 0–10

Piotr Nieżurawski, update: 2017-08-01, id: en-numbers-0000206, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the difference of the numbers from the two nearest rectangles from the lower row: from the number in the left rectangle the number in the right rectangle is subtracted. Enter the appropriate numbers in the empty rectangles.

Answer:

5 Problem – Number triangle, addition, 0–20

Piotr Nieżurawski, update: 2017-07-28, id: en-numbers-0000210, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the sum of the numbers from the two nearest rectangles from the lower row. Enter the appropriate numbers in the empty rectangles.

Answer:

7 Problem – Number triangle, addition, 0–100

Piotr Niezurawski, update: 2017-08-01, id: en-numbers-0000220, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the sum of the numbers from the two nearest rectangles from the lower row. Enter the appropriate numbers in the empty rectangles.

Answer:

8 Problem – Number triangle, subtraction, 0–100

Piotr Nieżurawski, update: 2017-08-01, id: en-numbers-0000221, diff: 1

In the following number triangle in each rectangle except those in the lowest row there must be a number that is the difference of the numbers from the two nearest rectangles from the lower row: from the number in the left rectangle the number in the right rectangle is subtracted. Enter the appropriate numbers in the empty rectangles.

Answer:
